Overview

System and Program Indicators Reports are published quarterly and furnished to CSB trustees, the Rebuilding Lives Funder Collaborative, and the Continuum of Care Steering Committee. All reports are posted to www.csb.org. Results are also shared with CSB funders consistent with funding contracts and agreements.

The System and Program Indicator Report monitors the current CSB funded shelter, services and permanent supportive housing programs and other Continuum of Care, non-CSB funded programs. The report evaluates each system and program based on a system or program goal, actual performance data, variances, and outcome achievements. Outcome achievement is defined as 90% or better of numerical goal or within 5 percentage points of a percentage goal, except where a lesser or greater value than this variance also indicates an achieved goal. Systems or programs which meet less than one-half of outcome goals are considered to be a "program of concern". The following key is used to express outcome achievement status for each indicator:

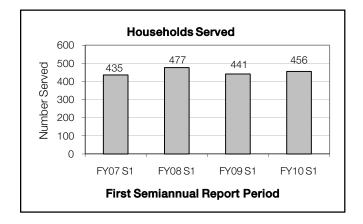

Outcome Achievement:	Key
Outcome achieved	$\sqrt{}$
Outcome not achieved	≠
Outcome goal not applicable	N/A

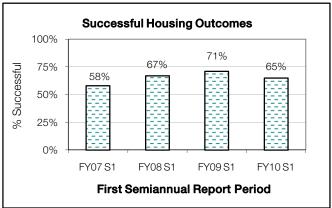

All data generated from the Columbus ServicePoint (CSP) and used in the report met CSB quality assurance standards, which require current and accurate data and a 95% completion rate for all required CSP data variables.

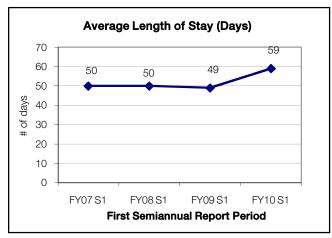

Data included in the report is analyzed per the Evaluation Definitions and Methodology document that can be found at www.csb.org under the Publications section.

Children 13 - 17 years	14%

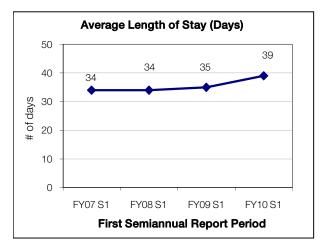

The Family System served 3% more households than during the same period of time last year. The spike in average length of stay from FY09 S1 to FY10 S1 is attributable to a change in methodology. Applying the new methodology to FY09 S1 data yields an Average Length of Stay of 62 days. The decrease in Nightly Occupancy reflects a real decrease in the Average Length of Stay. The percent of households working at entry continues to decrease.

The Men's System served 2% fewer men during FY10 S1 than it did same time last year. It is worthwhile noting the highest level of successful housing outcomes reported compared to the previous evaluation periods. Note that the increase in the Average Length of Stay is largely attributable to a change in methodology. (If the same methodology had been used in FY09 S1, the result would have been an Average Length of Stay of 39 days).

It is worthwhile noting the highest level of successful housing outcomes reported compared to the previous evaluation periods. Note that the change in methodology for Average Length of Stay during FY10 masks the reality that the change from last year is striking; applying the new methodology to FY09 S1 data yields an Average Length of Stay of 39 days. The drop in Average Nightly Occupancy reflects a real decrease in Average Length of Stay.

¹ Capacity does not include overflow.

² Lutheran Social Services is evaluated at the agency level rather than at the individual program level. Inclusive programs are Faith Mission on 6th, Faith Mission on 8th and Nancy's Place.

³ Faith Mission provides overflow services for FY10.

 $^{^{\}rm 4}\operatorname{Program}$ served fair share of households based on capacity and demand.

 $^{^{6}}$ Out of the number of households served, these number of households participate in the Rolling Stock Pilot.

 $^{^{\}rm 2}\mbox{Occupancy goal}$ is applicable only to Tier II Shelters.

³ Successful housing outcome calculates as x% of the YWCA's successful outcome measurement, which includes exits to both Tier II shelters and permanent housing.

⁴The Average Transition Time measures the average number of days households receive shelter services from shelter entry to entry/enrollment into the FHC program.

⁷ Program was unable to meet three out of five goals for the evaluation period. Due to the economy, Tier II shelters are serving households that take longer to stabilize. Because of the increased average length of stay, program did not serve the projected number of households and the lower number affected the successful housing outcome measure as well.

¹ Occupancy rates are calculated by dividing the occupancy number, which is rounded off to the nearest whole number, by the program capacity. The goal is 95% for the occupancy rate.

² The following PSH programs house clients that are receiving CHN Shelter Plus Care subsidies: CHN-Cassady (SRA/ 1 household); CHN-Parsons (SRA / 13 households); RLPTI (TRA / 22 households); Southeast Scattered Sites (TRA / 2 households).

³ Three of the 13 units can house up to two individuals and these units are frequently but not always assigned to couples in which both partners are Rebuilding Lives eligible.

⁴ Implementation of the RL Leasing expansion delayed due to HUD contracting. Capacity will increase to 120 as of 1/1/2010.

¹ Programs are non-CSB funded. Goals for these programs were set by each agency/program in accordance to the CoC set standards, if applicable.

² Occupancy rates are calculated by dividing the occupancy number, which is rounded off to the nearest whole number, by the program capacity.

³ Huckleberry House has the ability to expand capacity temporarily when necessary. Program capacity decreased to 24 as of 11/10/2009.

⁴ Program voluntarily participates in CSP.

 $^{^{\}rm 5}\,{\rm Not}$ evaluated as there were no exits during the reporting period.

⁶ VOAGO Veterans is able to exceed capacity at times because it has three overflow units.

⁷ The following programs house clients that are receiving CHN Shelter Plus Care subsidies: CHN-Family Homes (SRA / 7 households); CHN-Cassady (SRA / 1 household); CHN-Parsons (SRA / 13 households); RLPTI (TRA / 22 households); Southeast Scattered Sites (TRA / 2 households).

⁸ Occupancy rate exceeds 100% because CMHA allowed providers to overlease throughout the year.

⁹ Due to CMHA's mass unit transfer from TRA to Section 8, CHN TRA is experiencing a reduced volume of clients.

¹ New program implemented 7/1/2009. The program did not achieve any of the measures for which it was being evaluated due to a significant number of clients in the reconsideration process that require additional information before a determination for benefits can be made. By resolving reconsideration cases, the project will have a significantly higher outcome trend over time.
