

## Monthly Report on Program Occupancy Rates for Supportive Housing Programs

Definition of program occupancy rate: A percentage that reflects the average number of tenants residing in a program per night relative to the program capacity.

Purpose of Report: To monitor occupancy rates on an ongoing basis.

Date of Data Pull: 10/27/2021

Date of report issuance: 10/29/2021

Report prepared by: Thaddeus Billman, Data Analyst

Methodology: CSP data will be pulled for each report period, which in this instance consists of a single calendar month. The occupancy number is calculated by summing the length of stay within the report period for all tenants in a program and then dividing that sum by the number of days in the report period.

Occupancy number:  $\frac{\sum((\text{report end date (or exit date in the event the tenant exits the program)} - \text{report start date (or entry date in the event of a new tenant)}) + 1)}{\text{number of days in report period}}$

Occupancy rates will be calculated by first rounding the program occupancy number to the nearest whole number. Next the rounded program occupancy number will be divided by the program capacity, which is defined in the current fiscal year Program Outcome Plan.

Limitations of analysis: CSP data will not have been subjected to quality assurance prior to data extraction.
